Female Blood Group Detection

Female Blood Group Detection Report

PATIENT DETAILS

Patient Name : Advait Vaishnavi Thale

Age / Gender : 21 Years / Female

Contact Number : 09137174741

Address : Sulocana Vaity Chawl Rm No 1 No 2 Borla Govandi Village Mumbai 400088

Report Generated On : 18-05-2026 15:17:23

FINGERPRINT ANALYSIS RESULT

Detected Blood Group : A+

Prediction Confidence : 99.45%

Detection Method : AI Powered Deep Learning Model (CNN)

FINGERPRINT SAMPLE

INTERPRETATION

The fingerprint sample was analyzed using an Artificial Intelligence based Deep Learning model trained for female blood group prediction. The generated result represents the predicted blood group pattern identified through biometric fingerprint analysis techniques.

PROJECT CONTRIBUTORS

Payal Babar — Student of AI & DS

Trupti Babar — Student of AI & DS

NOTE

This report is generated using AI-powered fingerprint analysis and Deep Learning techniques for female blood group prediction. The generated result is only an AI-based prediction and may not be 100% accurate. This report should be used for academic and research purposes only.
